

Project Design Phase 1

Solution Architecture

Date	17 October 2022
Team ID	PNT2022TMID40554
Project Name	Estimation of crop yield using data analytics
Maximum Marks	4 Marks

Solution Architecture:

Solution architecture is a complex process – with many sub-processes – that bridge the gap between business problems and technology solutions. Its goals are to:

- I. Find the best tech solution to solve existing business problems.
- II. Describe the structure, characteristics, behavior, and other aspects of the software to project stakeholders.
- III. Define features, development phases, and solution requirements.
- IV. Provide specifications according to which the solution is defined, managed, and delivered.
